⊅ Digital media Post Size :- 1080 × 1080

Beeding = Extra Partion of visiting ccard

for zooming use = ALT + Scroller
                  Control + (+,-)

To move artboard = Space key + move anywhere

To select = (v)

\# Rectangle tool = (m) for create square shape
                        Shift + create

\# To create square from from Circle = Shift + alt
                                        + create

\# EPS → Extention can use In any softweare

\# If wanted to rotate a shape

\# Border = stroke

to copy and Paste In front = Ctrl c, Ctrl f
  " " " " " Back = Ctr +C, Ctr +B

☆ Ctr + D = to repeat last step.

to select multiple object use Shift key

# Anchor Point = Is u points of an object

Reolar tool = Ctr + R

$*$ To delete an anchor point use anchor tool (A)
select anchors → shift + select anchor point
↓
Delete

Add Artboard ⇒ Select the artboard tool

$$(Shift + o)$$

To change an artboard orientation can use
orientation button from control panel

# Round tool (L)

to create rounded square

Anchor Point

use this point
to round the corner

to move 4 corner = select anchor point
↓
drage anck @here

\# Direct selection tool (A)

\# To fill colour in object directize from another object use Eye dropper tool (I)

\# Shape builder tool (Shift + m)

\# to select an object in another size or devide Into Raws / coloms

$$OBJECT$$
$$\downarrow$$
$$Path$$
$$\downarrow$$
$$Split \quad Into \quad grid$$

\# Clipping mask. = used to. Set and Image Into object / Shape / Text

\# Ctl + 2 = to lock an object / Image another way = object
$$\downarrow$$
$$lock$$

☆ TOOLS

\# Selection tool (V) = to select an Image or object

\# direct selection tool (A) = to ccess an another Points

group selection tool = select a group of points at once

magic wand tool (y) = select an object colour in the document can make changes in that like fill color change & color Remove

lasso tool (q) = to select multiple Anchor points from multiple object.

pen tool (P) = to create any shape object. It works like a pen to draw an image / object

Add anchor point (+) = to add an anchor point to path

delete anhor point (-) = to delete an anchor point of a path

pen tool (D) = to create line like pen

curvature tool (shift + ~) = to add an anchor point with handle can change curvs of shape It works on shape only

Type tool (T) = To add text

Type on a Path tool = To write on object's Path

Ex :-

    🌑 write text on circle / square or
    aney other shape

Area type tool = To write in the shape
      (it will cover the whole shape)

verticle area type tool = to type vertically
            In the object.

vericale type on a path tools = It will
   type vertically in shapes path.
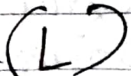

Line tool (L) = to create line ————

Arc tool = ‖ ‖. Arc ⌣ line

spiral tool = ⑥

Rectangular grid tool = ⊞

Polar grid tool = ✴

Rectangle' tool = (m)

Round tool = (L).

Saathi

Eclips. tool — (L) circle creation

★ Polygone tool

★ Star tool

Paint brush tool (B) Blob brush tool
(shift + B)

★ Shapeer tool (shift + N)

★ Eraser tool (shift + E)

★ Scissor tool (C)

★ knife tool

★ Rotate tool — (R) = to Rotate a shape
or line

★ Reflact tool (O)

★ Scale tool (S) = to create copy of
an object with resizing

★ width tool (shift + w)
Warp tool (shift + R)
Twirl tool / Scallop tool
Pucker tool / Cystallize tool
Ploat tool / wrinkle tool

to create
different
type of shape

\# Shape Builder tool (shift + m)

    use to marge (remove. two or more
               shapes.)

live Paint bucket tool = to color in.
                              Perticul. shape

Transform Tool = to used rotate scale tools
                      together.

\# for blanding Effect can use opacity

\# to devide an artbourd = object
                              ↓
                           slice

\# to place an image to an shupe (object.
        object.
         ↓   another cuy.   right cic
      clipping mask   make clip'sn
                                  mast

\# If. wanted to put an image in text

     = text   right click
        ↓   ↓
   right click   · create outine
      ↓   ↓
 Create outine   right click.
      ↓   ↓
               make compaud

free tranform tool = Effect
